

Introduction

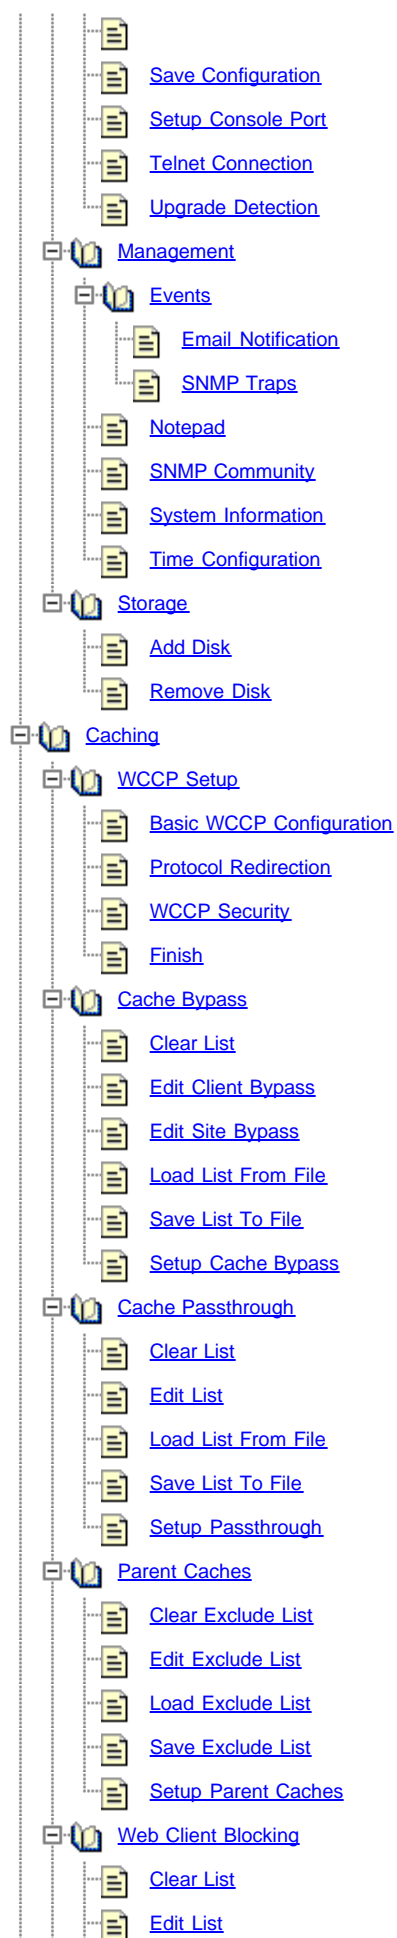

This Online Help is intended for the system or network administrator who is responsible for installing, configuring and managing the network. It assumes a basic working knowledge of local area network (LAN) and wide area network (WAN) operations.

Note: *If Release Notes are shipped with your product and the information there differs from the information in this Online Help, follow the instructions in the Release Notes.*

More information on the Webcache can be found in the *Webcache User Guide*.
